

# INSTRUCTIONS

Thanks for purchasing this add-on. To load the brushes please follow the instructions below.

Open the EPS file, using the file/open menu. The brushes will now appear in 'Brushes Tab'.

## To use the brushes...

1. Select the 'Brush Tool' from the 'Tools Menu'.
2. Open the 'Brushes Tab' and select one of the brush icons
3. Click where you'd like the brush stroke to fall and it will be applied.

Or-

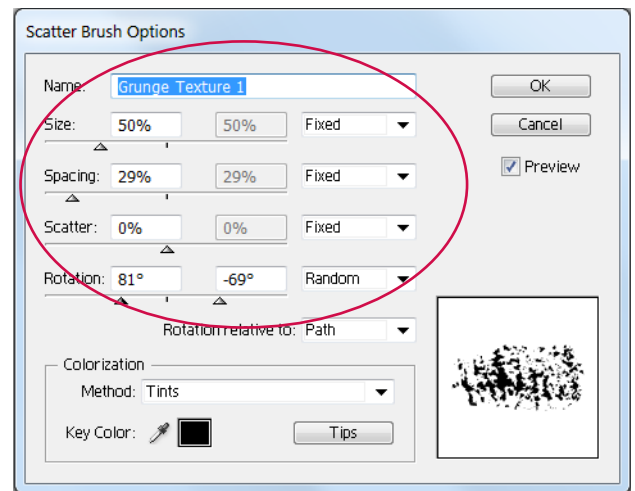

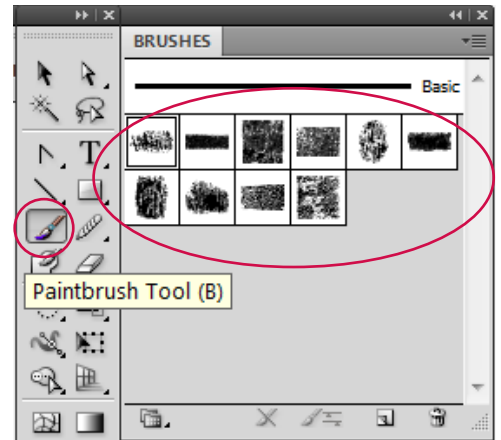

1. Draw a line with any of Illustrator's drawing tools.
2. Select the line with the 'Selection Tool'.
3. Click one of the brush icons and a number of brush strokes will be applied along your line.

## Tips -

You can change the colour of your brush stokes by amending the colour of the stroke.

To adjust the size, rotation, scatter or spacing of the brush strokes do the following:

1. Double click on the relevant brush tab icon and a menu will appear (shown opposite).
2. Move the sliders to adjust the settings. Also try changing the options in the drop-down menus (circled opposite). You will notice the changes next time you draw with the brushes.
3. Click OK.
